Acknowledgment

I would like to express my special thanks of gratitude to my teacher **Mr. Anurag Bhardwaj** who provided me an excellent Guidance on **Web Development**. I am very thankful to him for clearing my all doubts about different Web Development methodologies and different tools for development of a website in an effective manner. He gave me the golden opportunity to do this wonderful project on the working of **NGO**, and also helped me in doing a lot of Task which is difficult for me alone without help and I came to know about so many new things I am really thankful to them.

Secondly, I would also like to thank my Team and friends who helped me a lot in finalizing this project. My team works really hard for this Project This cannot be done without the hard work of Whole the team Members.

INTRODUCTION

This website is very useful for any non-government organization to develop its social services in a more effective manner so that they can improve society without any poverty and illiteracy.

This project is for a non-profit organization. This program will help the NGO to automate their system. The program mainly helps the organization to manage all its donors, manage funds received by the donors, and the money spent on different projects.

A non-governmental organization (NGO) and (Voluntary Organization) VOs is a legally constituted organization created by natural or legal persons that operate independently from any government. The term is usually used by the government to refer to entities that have no government status. In the cases in which NGOs are funded totally or partially by governments, the NGO maintains its non-governmental status by excluding government representatives from membership in the organization. The term is usually applied only to organizations that pursue some wider social aim that has political aspects, but that are not overtly political organizations such as political parties. Unlike the term "intergovernmental organization", the term "non-governmental organization" has no generally agreed legal definition. In many jurisdictions, these types of organization are called "civil society organizations" or referred to by other names.

ABOUT LUFHO: -

LUFHO is an idea for helping the people who are in need like Orphans. LUFHO is started this year only by the students of Chandigarh University (BE CSE-IBM-IS-2). Currently LUFHO have 10-12 active members and 4 leaders. We are trying our best to connect needed people with donors.

LUFHO is to empower underprivileged children, youth and women through relevant education, innovative healthcare and market-focused livelihood programmes.

LUFHO is to deploy best possible methodology and technology for achieving ideal social return on investment, to practice and promote good governance. To link business competitiveness of the corporate with social development initiatives; also to sensitize privileged children, youth and citizens in general to promote Civic Driven Change.

We believe that education is both the means as well as the end to a better life: the means because it empowers an individual to earn his/her livelihood and the end because it increases one's awareness on a range of issues - from healthcare to appropriate social behaviour to understanding one's rights - and in the process help him/her evolve as a better citizen. Education is the most effective tool which helps children build a strong foundation; enabling them to free themselves from the vicious cycle of ignorance, poverty and disease.

We realised that Education for Children cannot be achieved without the family, particularly, unless the mother is assured of health care and empowered. Moreover, when an elder sibling is educated and relevantly skilled to be employable and begins earning, the journey of empowerment continues beyond the present generation.

We will be extending its thematic areas of intervention by supporting family health, livelihood, and women empowerment. Children, their families and the community become the target group for Smile Foundation's activities as child education cannot be done in isolation and nothing else but education for children can bring long lasting change in the society.

LITERATURE REVIEW

In India and abroad, several studies have been made on voluntary organizations working in urban as well as rural areas. Much of the literature on voluntary organizations in Indian settings has come from traditional social work. Many of the Anthropologists, Sociologists, and Political Scientists are engaged in the study of voluntary organizations. Unfortunately, communication among the disciplines about their findings has been far from adequate.

According to McKinney et al. (2012) and Saxton and Guo (2011), information quality of a website is defined as perception of a website visitor that the website has disclosed complete, accurate, timely, and relevant information regarding performance, donation assistance, and finance. Studies have found that information quality of the NGO website is significantly important for risk reduction, trust development, loyalty, and satisfaction (Cyr 2008; McKinney et al. 2002; Nicolaou and McKnight 2006; Song and Zahedi 2007).

PROBLEM FORMULATION

Most of the NGOs in India are suffering from a paucity of funds. The government does not give cent percent of grants in aid or make a delay in sanctions of grants for numerous programs. NGOs have to make matching contributions that they are sometimes unable to manage and are, therefore, unable to avail themselves of the grants. Now a day's charity is not so strong in the minds and hearts of the people as it was in ancient society. This was another region for languish of funds for NGOs

It is a matter of fact that some unscrupulous elements have made fortunes by floating NGOs for their personnel gains and managing grants from the government. It is a common experience that there have been serious charges of misuse and misappropriation of funds received as grant-in-aid from the government, foreign donors, and raised through their own resources by most of the NGOs. These NGOs may reflect their image to other NGOs who are working with dedication and commitment.

RESEARCH OBJECTIVES & Contribution

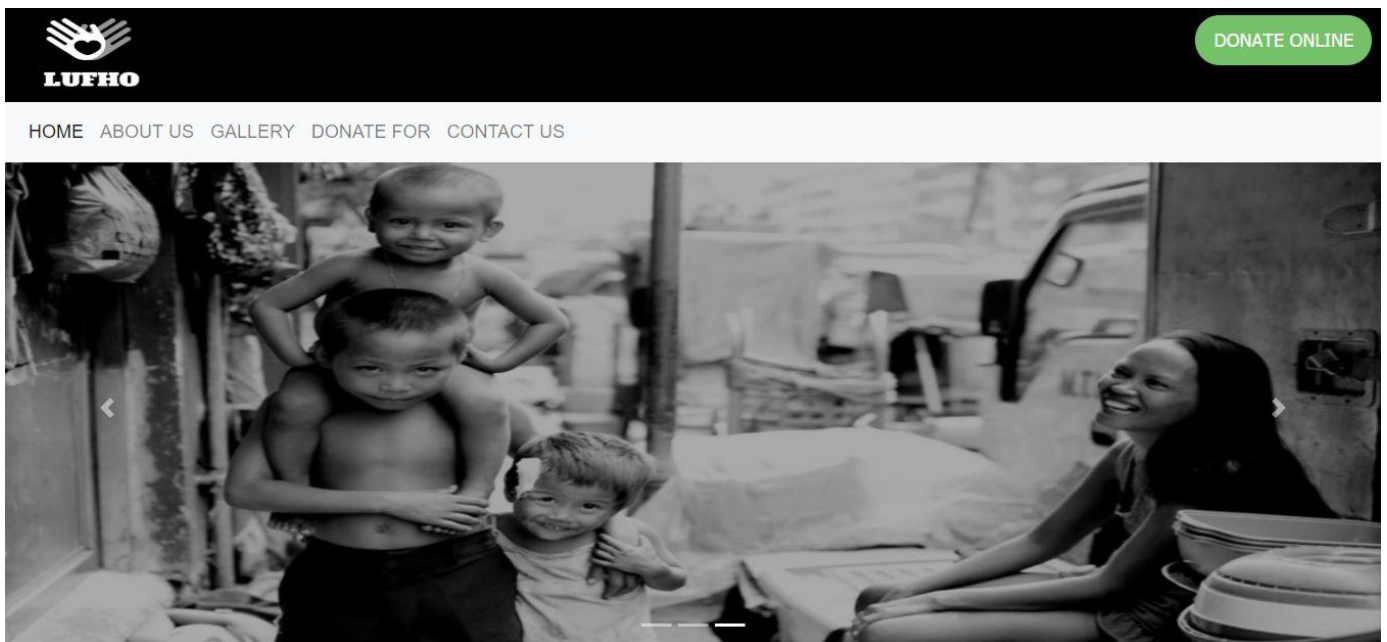

The main objective of this website is to manage this NGO day by day customer-related activities digitally, earlier they have maintained manually in which case it takes a long time to search for each events/activity.

We have website based on NGO using HTML5 ,CSS and BOOTSTRAP mainly also we took help from www.google.co.in and some other website mentioned in references' made our project in a good and easy manner by dividing our task in whole the team. Our project is small as now but we are planning to do a great contribution in the project and we wish to work life time for the project we have started (by the help of college student). We are going to help needed person as much as effectively as we can. Our main motive is to collect donation from who soever is willing to donate and we will use this donation by helping orphans and who so ever needed it. Initially we just made website first then we have to do a lot many tests to lead our project towards success.

METHODOLOGY ADOPTED

- I. First of all, we came to know that a large number of population are homeless, away from balanced diet not able to take even primary education.**
- II. We are planning to make a team and start working one of us will start developing android app named as lufho once we will finish this project. For now along with my team I started developing website <https://lufho.000webhostapp.com> .**
- III. For this we used HTML5, CSS, Bootstrap, and other needed skills. Also took the guidance from Mr. Anurag sir.**
- IV. We created front end using bootstrap and we use payment gateway from www.instamojo.com as it is secure.**
- V. We have used tawk.to for live chat option provided in contact us portion of website.**
- VI. Also we used some icons from www.materialicons.com also we use www.googlefont.com for certain fonts.**
- VII. In between we used to take help from www.google.co.in and guidance of Anurag sir make a difference.**

PROJECT SCREENSHOTS

Home screen:

At home screen of website we have logo of the LUFHO organization on other side we have online donation button well designed and well secured. Next we have navigation baar then slidder navigation bar navigate user to directly jump to his/her required portion of website.

Paying to
lufho9

Purpose of Payment
lufho- a non profitable org

Amount ₹20

Your Details > Payment

Select a Payment Method

UPI BHIM

CREDIT CARD

DEBIT CARD

NET BANKING

WALLETS

NEFT/BANK TRANSFER

Nominal convenience fee applicable

PAYMENT:

We have various options for payment for example doner can donate using **upi** service , using credit card , using debit card, net banking and all kind of other wallets as you can see. We have provided so many options methods of payment so that doner feel comfortable with the process of donation.

ABOUT US

LUFHO

-Lets Unite For Helping Orphans

LUFHO is to empower underprivileged children, youth and women through relevant education, innovative healthcare and market-focused livelihood programmes.

LUFHO is to deploy best possible methodology and technology for achieving ideal social return on investment, to practice and promote good governance. To link business competitiveness of the corporate with social development initiatives; also to sensitize privileged children, youth and citizens in general to promote Civic Driven Change. We believe that education is both the means as well as the end to a better life: the means because it empowers an individual to earn his/her livelihood and the end because it increases one's awareness on a range of issues - from healthcare to appropriate social behaviour to understanding one's rights - and in the process help him/her evolve as a better citizen. Education is the most effective tool which helps children build a strong foundation; enabling them to free themselves from the vicious cycle of ignorance, poverty and disease.

ABOUT US

about us describe about us who we are how lufho work etc.

GALLERY

Gallery of website

We update our work done in the form of images on our website so that doner can see his/her money used in a good manner also soon we will update it by adding news sections so that we can inform user about our upcomming events.

DONATE FOR

Donate for (reason)

Mainly for choosing in which area doner wish to donate (for education or medical or tech. Or community or for environment or for animal welfare)

Contact Us included live chat

We provide the source to contact with us so who so ever wish to reach us can reach.

We also provide option for live chat. We are also looking for providing our exact location using google map, we still working on it.

CONCLUSION AND FUTURE SCOPE

This is very basic project in the field of Web development. This project can also be regarded as the beginner's project in the process of learning Web development. This project can be improved a lot as soon as we increase the number active team members and doner and lot of funds, I have just used basics for development we can give a login panel to both admin and donner, they both can have different access to things they are related to. We have wo do lot of work till now also we adopt a methodology that we keep on learning and we keep on modifying our website. One day we made our website so much useful for the society also we keep on learning and keep on adding new features for users.in future this project really going to prove itself very-very useful for the needy people and also helpful for maintaining peace in our country.
